

Timesheet App: Efficient Timesheet Management for Jobs Module

Tapping simplicity, flexibility and efficiency to manage employees better

- Do you use Microsoft Dynamics 365 Business Central and a separate timesheet app?
- Is employee time tracking and data management always a nuisance and manual?
- Are you looking for a comprehensive all-in-one solution to easily sync time entries into your Business Central jobs module?

Introducing our Timesheet App for Jobs Module,

an efficient yet intuitive timesheet management app that integrates seamlessly with the jobs module in **Dynamics 365 Business Central**. The app is built to ensure easy and flexible time tracking of your growing employees, removing the administrative burden and improving data accuracy.

Flexible Time Tracking Solution

Quick and easy time entry inputs from the job site

Simple user interface with flexible time tracking

Capture accurate time log details

Integrate your resource time entry with the jobs in Business Central

Get accurate costing of each job or project

Easy getaway for generating billing hours or measuring employee efficiency

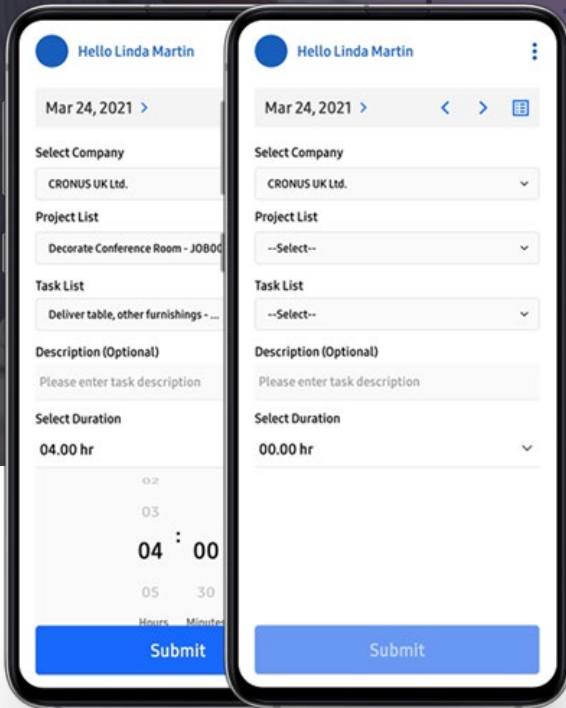

Avoid spending heavily on CRM licensing costs to manage time tracking

Real-time data synchronisation across Business Central

Why use a Timesheet?

- Simple
- Flexible
- Accurate
- Consolidated

Track employee timesheets and manage teams with ease

Employees such as contract workers can easily input time entries from different job sites using their phones. Hence, calculating job costing is easy with this app, as the timesheet information can be directly accessed from the app in Business Central.

Automatically calculate individual job/project costing based on time entry and eliminate room for errors. In addition, modified time entries will automatically sync in the system, facilitating companies to bill clients- all right from the app directly!

Get accurate costing of each job or project

Consolidated Platform for Time Entries

Streamline the time-entry process and make time-entries effortless with this consolidated platform. The entries made through the app seamlessly sync with Business Central, reducing the multiple need to access Business Central.
