Why You Need **E-commerce Connector**?

Investing in our E-commerce Connector is a smart choice. Here's why:

1. **Integration and Beyond**
   Our app's adaptability conveniently extends to third-party integrations. That said, we don't stop at Amazon and eBay. Our system can be tailored to integrate with other e-commerce platforms based on your specific needs.

2. **Inventory Synchronisation**
   Keep stock levels on point! Maintain accuracy for demand and supply management. Automatically synchronise inventory levels from single or multiple warehouse locations, visible in your web stores and Microsoft Dynamics 365 Business Central ERP.
   (Updates occur hourly (every three hours in Germany) to ensure real-time data accuracy.)

3. **Streamlined SKU Mapping**
   Easily map product SKUs to Business Central, reducing errors and ensuring seamless integration.

4. **Efficient Tax Handling**
   Record and manage taxes efficiently, facilitating smooth settlements and minimising discrepancies.
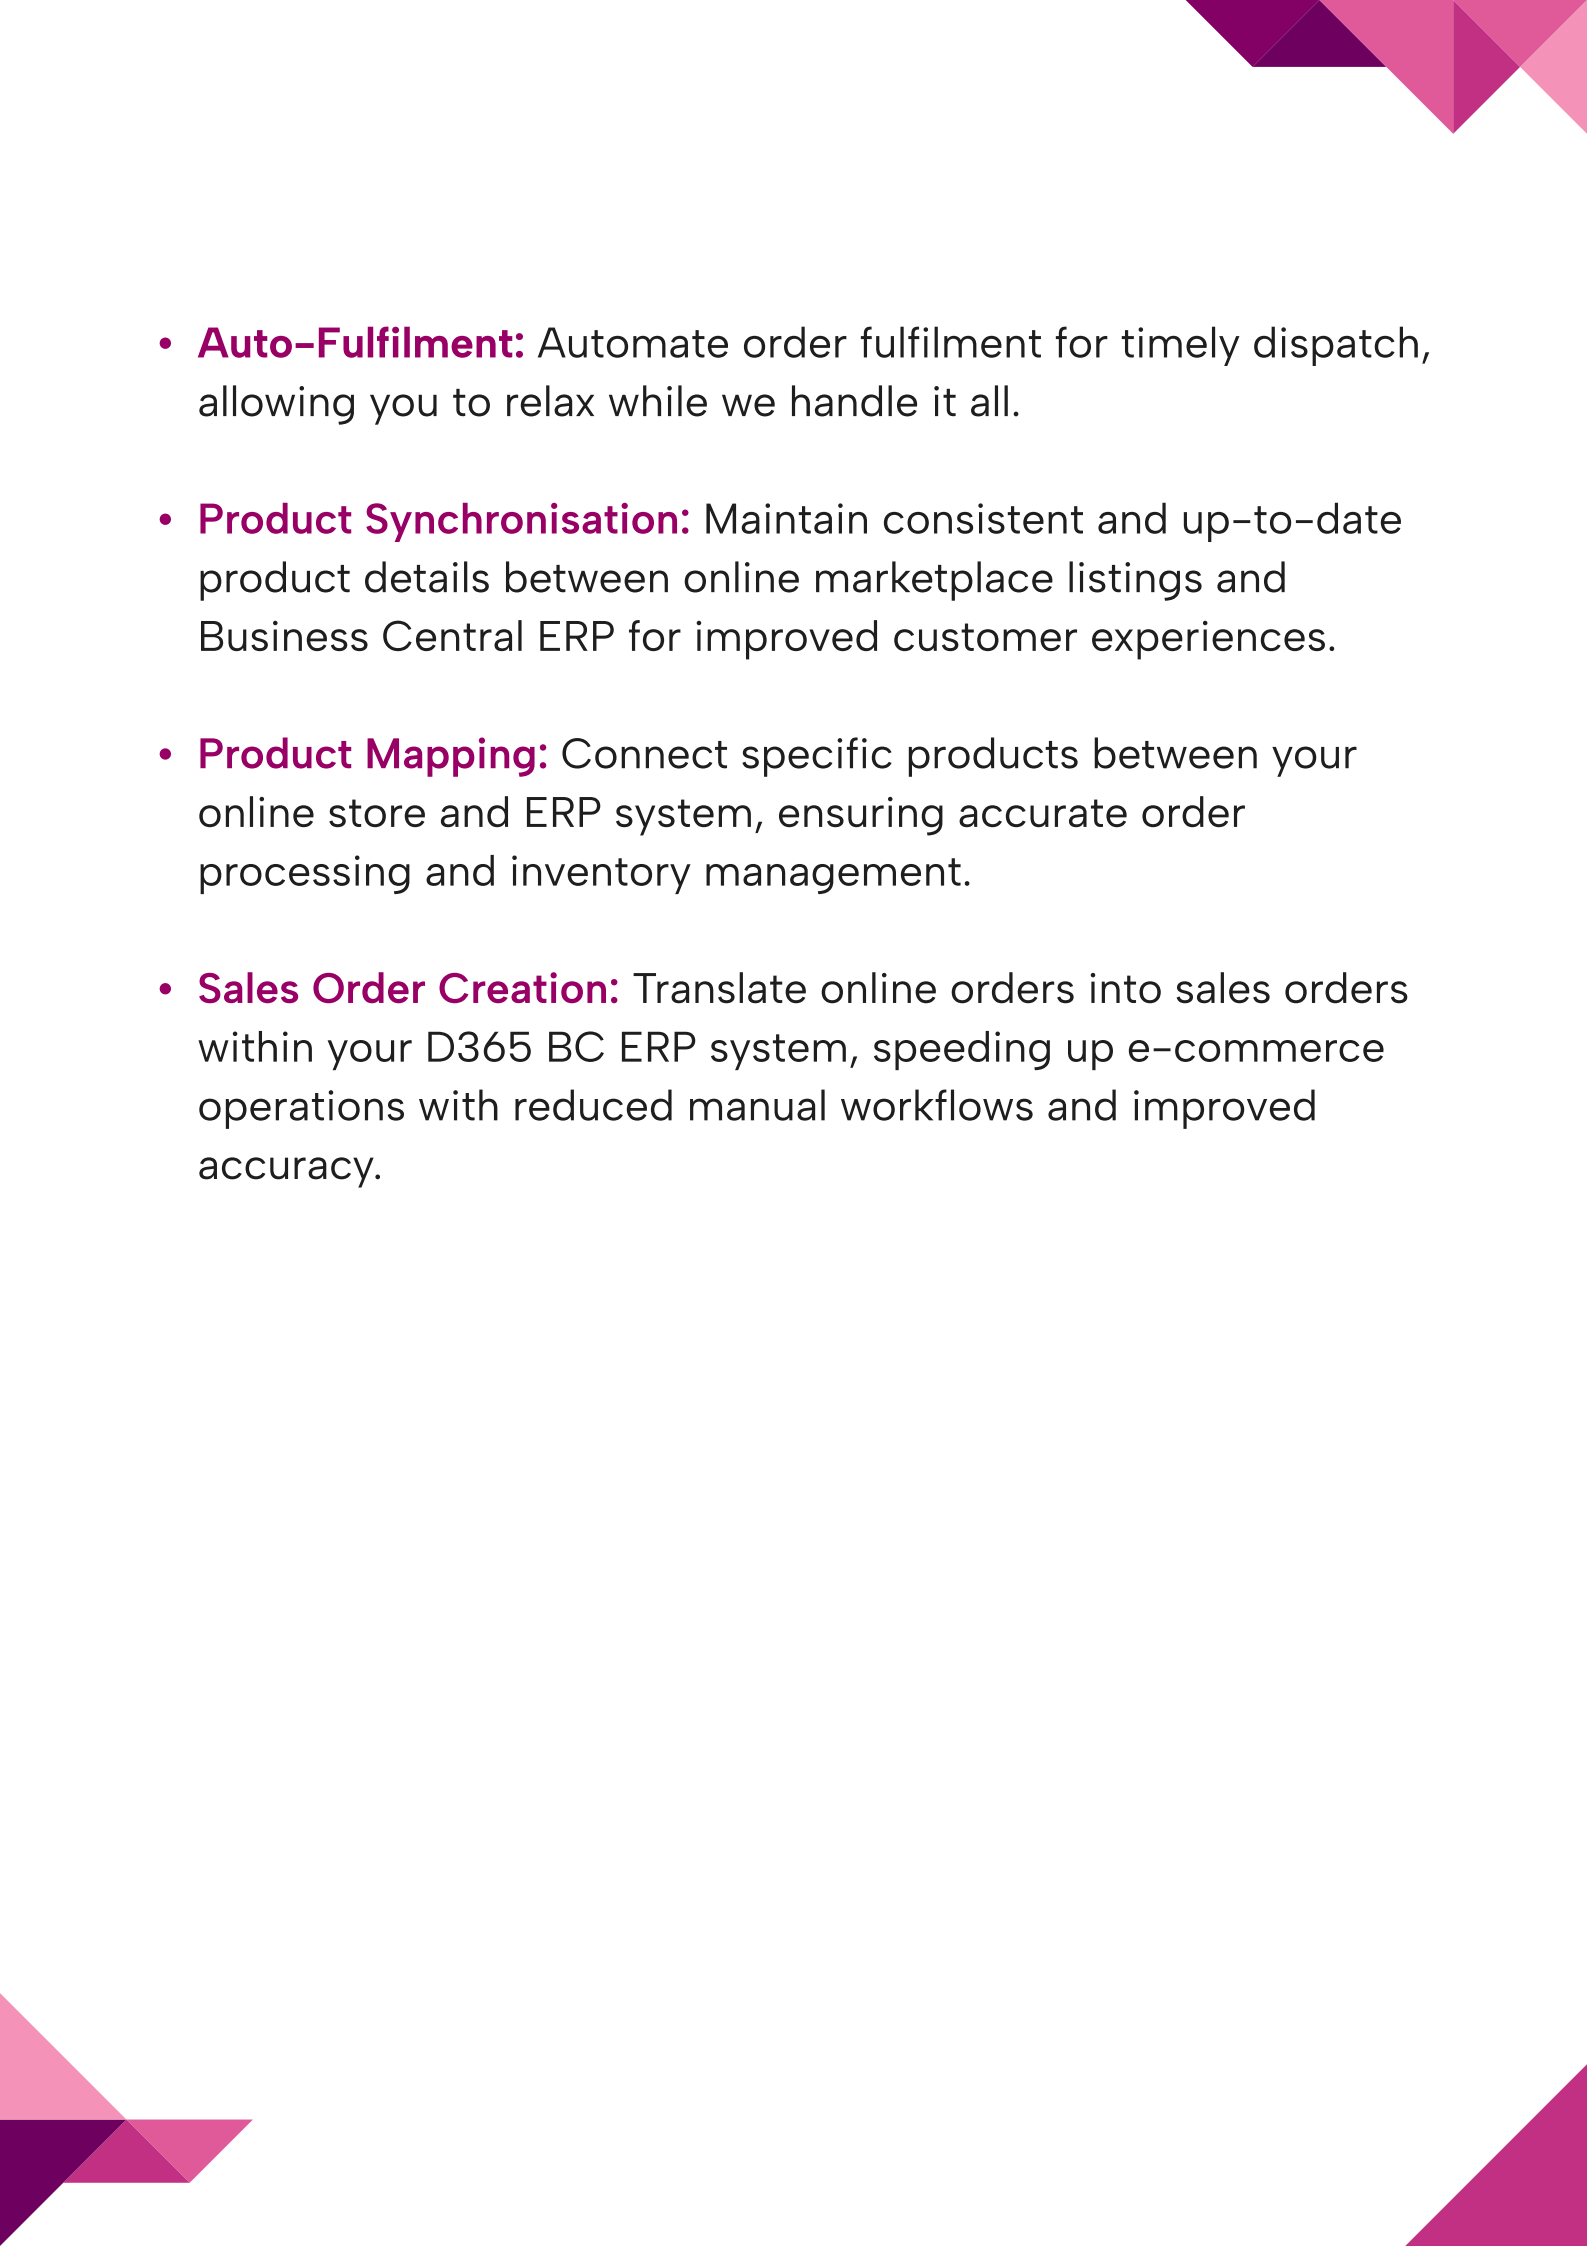

5. **Time-Efficient**
   Automate processes and liberate your team's valuable time.

6. **Error Prevention**
   No more hiccups, stumbles, and glitches. Our robust error-handling mechanisms ensure minimal mistakes and heightened data precision.

Features and Benefits

- **Real–time Synchronisation:** Orders, invoices, and dispatch details stay in constant sync with Microsoft Dynamics 365 Business Central for up–to–the–minute accuracy.

- **Effortless Dispatch:** Seamlessly integrate dispatch information, making order fulfilment a breeze, meeting customer expectations with precision.

- **Financial Visibility:** Automated synchronisation generates invoices and reflects financial transactions instantly in Business Central, freeing you from endless spreadsheets.

- **Marketplace Integration:** Connect your marketplace accounts, optimizing e–commerce operations.

- **FBA and FBM Support (For Amazon):** Catering to both Fulfilment by Amazon (FBA) and Fulfilment by Merchant (FBM) for flexible order handling.

- **Order to Invoice:** Enhance order management by effortlessly converting orders into precise invoices.

- **Invoice to Cash:** Efficiently manage marketplace transaction fees, with integrated weekly or biweekly settlements for faster access to funds.

- **Returns and Reconciliation:** Handle returns, cancellations, and damaged goods with ease, simplifying return orders with corresponding credit memos.

- **Push Inventory:** Keep inventory availability up to date, calculated hourly for precision.

- **Auto-Fulfilment:** Automate order fulfilment for timely dispatch, allowing you to relax while we handle it all.

- **Product Synchronisation:** Maintain consistent and up-to-date product details between online marketplace listings and Business Central ERP for improved customer experiences.

- **Product Mapping:** Connect specific products between your online store and ERP system, ensuring accurate order processing and inventory management.

- **Sales Order Creation:** Translate online orders into sales orders within your D365 BC ERP system, speeding up e-commerce operations with reduced manual workflows and improved accuracy.

Sirius E-Commerce Connector App FAQs

What is Sirius E-Commerce Connector 365?
Sirius E-Commerce Connector is an add-on solution for Microsoft Dynamics 365 Business Central, designed for integrating various marketplaces, including Amazon and eBay.

Can I integrate more than two apps using Sirius E-Commerce Connector?
Yes, you can integrate multiple apps based on your specific needs. Our platform supports multiple integrations, providing flexibility in your setup.

How long does it take to set up an integration between Microsoft Dynamics 365 Business Central and eBay/ Amazon?
The setup time depends on the complexity of the integration. With Sirius E-Commerce Connector's user-friendly interface, many integrations can be completed within minutes.

How often does Sirius E-Commerce Connector sync data between Microsoft Dynamics 365 Business Central and eBay/Amazon?
Sirius E-Commerce Connector is, by default, set to synchronise data between Microsoft Dynamics 365 Business Central and eBay/Amazon every 15 minutes. But this timing is configurable and can be adjusted to suit your specific requirements. Depending on transaction volume and any API restrictions imposed by Amazon or eBay, this interval can be reduced to as little as a minute.

What happens if I disconnect one of the apps from Sirius E-Commerce Connector?
If you disconnect an app, the integration will no longer work, and data sync will stop. However, you can easily reconnect the app and resume the integration.

Is there a limit to the number of integrations I can set up using Sirius E-Commerce Connector?

No, there isn't. You can set up as many integrations as you need, depending on the apps you use.

What if I need help setting up my integration?

If you need help setting up your integration, contact our Sirius E-Commerce Connector support team for 24/7 assistance.

Can I integrate web stores situated in different regions of the world?

Yes, you can. Our app supports integration with web stores in various regions, including the US, EU, the UK, and APAC.

Can I integrate multiple e-commerce stores with Business Central using the same connector?

In many cases, yes. Connectors can often be configured to handle multiple e-commerce stores, allowing you to centralise your e-commerce operations within Business Central.

What types of data can be synchronised between eCommerce and Business Central?

Common data types include orders and invoices, customer information, product details and inventory levels, shipping and tracking information, pricing and discounts, and tax details.
