

# Sirius sharepoint365

Is sharing files and generating documents across Dynamics 365 Business Central and SharePoint consistently erroneous and manual hassle?

Are you looking for a simple, one-stop solution to create a seamless connection between your ERP and SharePoint?

## Sirius Share Point 365: Factsheet

---

Sirius Share Point 365 bridges the disconnection between SharePoint and Microsoft Dynamics 365 Business Central and offers a seamless connection, removing the manual and error-prone process of importing and maintaining data and files between SharePoint and Dynamics 365 Business Central.

**Introducing Sirius Share Point 365**, a one-stop, single setup solution built to automate the tedious manual processes of importing data from Dynamics 365 Business Central to SharePoint. A simple and intuitive solution that seamlessly connects data in SharePoint and Business Central, without having to go back and forth, reducing redundancy, and enhancing overall productivity.

## Why you need **Sirius Share Point 365**?

1

### **Time Saver and Error-Free**

It offers easy access to SharePoint folder directly with just one click, saving valuable time that can be utilised for strategic tasks without having to leave the Dynamics 365 Business Central.

2

### **Boost Productivity**

Open and store any documents from Microsoft Dynamics 365 Business Central in SharePoint, without switching between the platforms.

3

### **Manage All Information From One Place**

Access any content or information located in a SharePoint folder directly within Dynamics 365 Business Central, enabling your business to quickly map data and content from ERP with a single consolidated view to make intelligent business decisions.

4

### **Maintain Data Consistency**

Ensure data consistency and quality by mapping and categorising similar content from Dynamics 365 Business Central to specific SharePoint folders.

5

### **Hassle-Free With Drag-and-Drop Functionality**

Upload files and data with simple drag and drop functionality managed on SharePoint per entity per record, which can be later accessed on the go.

6

### **Single Source of Truth**

There is no need to switch between apps to get a single consolidated view of the content. The files are automatically stored in a SharePoint Document library with managed folders.

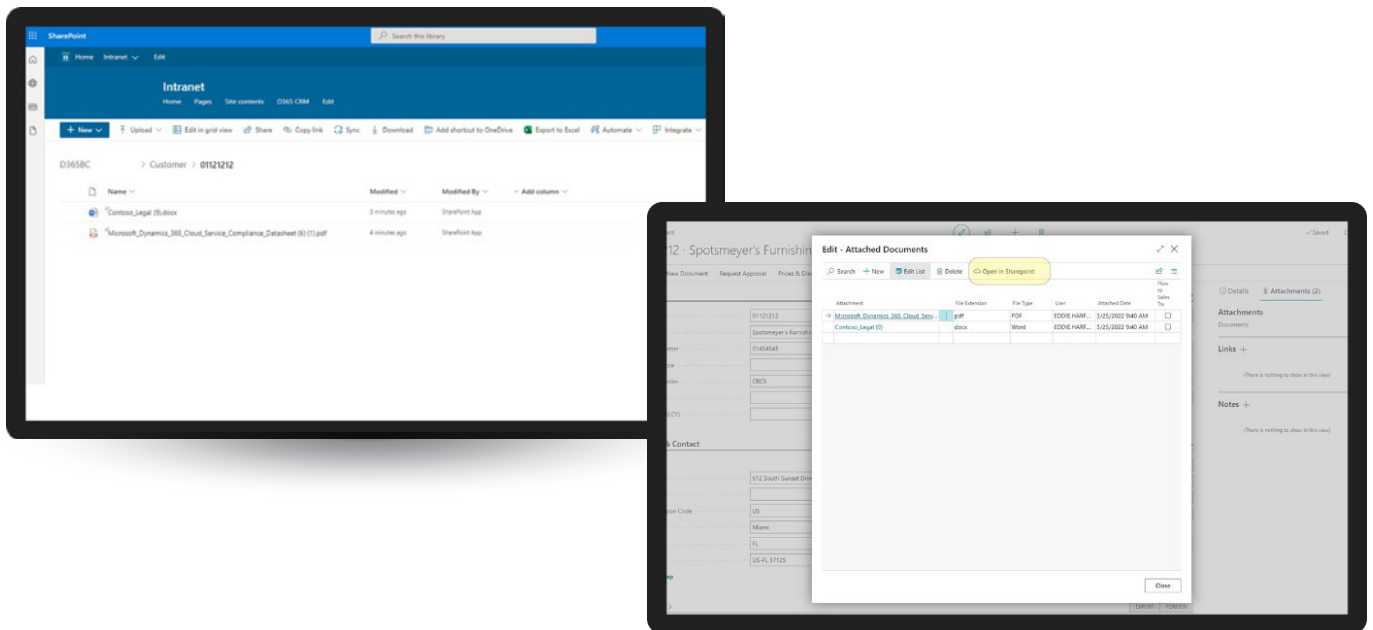

7

### **Easy-to-Use and Automated**

The drag and drop functionality simplifies the document upload and downloads without having to leave the BC environment. You can automatically upload any documents from ERP to SharePoint with a single step.
