Orders received	Value of order
250	**£7500**

Sirius Shopify 365: Factsheet

Sirius Shopify 365 bridges the disconnection between Shopify and Microsoft Dynamics 365 Business Central. With this one-stop solution, you can create accurate orders, and sync inventories with the auto pull data mechanism. In addition, users can quickly get real-time information about the orders from the buyers.

Sirius Shopify 365 automates transactions, inventory, product listings, customer info, sales orders, and more between your Microsoft Dynamics 365 Business Central and Shopify. It supports Shopify with an easy to navigate interface that can quickly configure the integration inside Business Central, giving you a breather, keeping worries about missed orders and inventory entries at bay. Get the auto data sync and real-time data information from Sirius Shopify 365 and converge all your focus on growing your e-commerce business.

Why Choose Sirius Shopify 365?

1 **Manage your eCommerce From One Place**
Seamlessly integrate your Shopify e-commerce software with your Dynamics 365 Business Central ERP system and manage all your data from one consolidated platform. This makes you a data-driven business, turning your data into powerful insights.

2 **Boost Customer's Buying Experience**
Enhance your customers' buying experience and boost your productivity with speedy order fulfilment, accurate product availability, real-time orders, inventory tracking, etc.

3 **Easy Setup and Configuration**
Configure shops, enter shop codes, and connect your Shopify with easy and one-step mapping of items and item variants between Shopify and D365 Business Central.

4 **Automated Data Sync**
Auto pull locations, products, variants, inventory, event subscriptions and track notifications saved in history with simple steps. Users can easily integrate the products, orders and inventories from Shopify into D365 Business Central.

5 **Create Accurate Orders and Shipments**
Create accurate orders and sync inventories with the auto pull data mechanism, wherein users can quickly get real-time information about the orders from the buyers. This saves time and reduces sales losses caused due to inaccurate inventory and price updates. In addition, quickly set up carriers with integration to major shipping gateways and support for online payment services.

6 **No Double Data Entry**
Put an end to double data entries, which automatically reduces errors and delays. How? Changes entered in Shopify or ERP get updated automatically on all the platforms. In addition, details of the products like description, name, pricing, inventory or category are also synced.
